

Capability Statement

KRIHOS International provides a dynamic **management systems software solution** that streamlines management of diverse business systems while enabling an organization to reduce costs, eliminate waste, and continually improve operations.

Audit XL[®] automates management systems for any business function, including Environmental, Health & Safety, Sustainability, Quality Assurance, and more. Users can easily integrate requirements for organization protocols, industry standards and government regulations into one coherent customizable program.

Expertise Summary

With 30+ years of safety and health management experience with leading international manufacturers, KRIHOS founder and President Don Kricho designed Audit XL to optimize a systematic approach to management, which ensures continual improvement of the entire production process.

Industry leaders in risk management and engineering/construction management rely on Audit XL to support award winning risk management, EHS and quality programs. KRIHOS relies on input from these and other users to continually improve Audit XL's capabilities and ensure that it evolves with customer needs.

Audit XL[®] *Key Benefits*

- Reduce costs, increase efficiency and continually improve operations
- Direct diverse management systems with one application
- Customize protocols that provide guidance for each business system, reducing the need for consultants, system-specific applications, or extensive IT support
- Automate performance evaluation required by unique organization protocols while increasing employee participation and consistency
- Improve communication and comprehension of requirements for all business systems with consistent template formats
- Eliminate waste and save significant time, labor, and money with on-demand reports associated with audits, self-assessments, corrective action planning, etc.

Audit XL[®] / *KRIHOS Differentiators*

- The Audit XL Developer enables users to readily create new and customize existing content modules for specific business functions
- Audit XL enables full integration of unique organization protocols with voluntary industry standards and government regulations
- Reputation for dedication to meeting customer needs through continual product improvements
- Extensive management systems experience with leading international manufacturers
